

## SITECONNECT™ MOBILE INSIGHTS

- Unlock plant & equipment performance from anywhere - beyond system silos.
- Seamlessly connected data from all sources, turned into actionable insight.

## ON DEMAND MOBILE INSIGHTS INTO PLANT, EQUIPMENT, AND OPERATIONAL CONTEXT.

# THE CHALLENGE

Your plant never stops – but people can't always be on site.

Cement operations run continuously, across shifts, teams, and locations. Yet critical decisions are often slowed by:

- Limited access to real time performance data outside the control room
- Fragmented communication between frontline staff, management, and experts
- Operational knowledge captured in notebooks, emails, or shift handovers instead of systems

The result is delayed response, lost context, and missed opportunities to improve performance.

# THE SOLUTION

## SiteConnect™ Mobile Insights App

SiteConnect™ provides secure, on demand, mobile access to real time and historical asset performance, health, and operational information – enabling faster, better informed decisions wherever you are.

Available on iOS and Android, SiteConnect™ is designed for plant, operations, and maintenance leaders who need visibility beyond the control room.

### Core Value Proposition

#### Make better decisions – faster and with confidence

- Improved performance visibility – anytime, anywhere
- Optimized asset management using trends and benchmarks
- Faster response to unplanned events through alerts and notifications
- Shared operational context across teams and shifts

### Key Capabilities

#### Asset Performance & Health

- Real time and historical trends (from 1 hour to 6 months)
- Intuitive tag based navigation and KPI collections
- Status at a glance indicators based on thresholds
- Performance benchmarking across assets, sites, or enterprises

ASSET LOG - DIGITAL OPERATIONAL CONTEXT FOR EVERY ASSET  
**A SOCIAL WALL FOR THE EQUIPMENT**  
 - CAPTURING WHAT HAPPENS BETWEEN THE DATA POINTS

Asset Log extends SiteConnect™ beyond sensor data by enabling digital logging of operational events directly against equipment and maintainable components.

**With Asset Log, teams can:**

- Capture ad hoc events, observations, and incidents
- Log notes as text, images, documents, or media
- Maintain a central, time stamped logbook per asset
- Comment on, subscribe to, and follow ongoing events
- Collaborate securely across roles and shifts
- Export complete asset logs to PDF with one click
- Digitally capture manual measurements and convert them into trends for monitoring, alerts, and analytics

Asset Log ensures that operational knowledge is never lost, and that asset history combines data and human insight.

**Why SiteConnect™ from Fuller**

SiteConnect™ is part of Fuller Technologies' digital and Industry 4.0 ecosystem, combining:

- Decades of process, automation, and reliability expertise
- Secure plant to cloud connectivity
- Integration with performance monitoring, diagnostics, and services
- A scalable foundation from individual assets to enterprise wide visibility

**Who It's For**

- Plant Managers
- Operations Managers
- Maintenance & Reliability Managers
- Anyone needing real time insight, historical understanding, and shared operational context — without being physically present at the plant.

# GETTING STARTED WITH SITECONNECT™

TO USE SITECONNECT™, THE PLANT MUST FIRST  
BE CONFIGURED WITH A FIELD AGENT.

## The Field Agent:

- Securely connects plant systems to SiteConnect™
- Enables data availability, asset structure, and configuration
- Forms the foundation for mobile insights, alerts, and Asset Log

Once the Field Agent is in place, SiteConnect™ and all its features — including Asset Log — are available to users.

## Commercial Model

- Available via subscription
- Or included with selected Fuller production solutions or services

**Download. Connect. Decide with confidence.**

Available on:

Apple App Store

Google Play Store

Contact Fuller Technologies to configure the Field Agent and activate SiteConnect™ at your plant.
